In 2011, the Institute of Medicine published The Future of Nursing: Leading Change, Advancing Health. One of its key messages and recommendations was the need for changes in healthcare education to match the breadth of transformation occurring in the U.S. healthcare system, both in terms of the care environment and in the practices clinicians follow to achieve improved outcomes.

Lifelong Learning in Nursing Is Vital

Stress and coping abilities influence the health and work performance of nurses. However, little is known about the combined influence of stress perception and perceived coping adequacy and its impact on the health of nurses. This study examined the relationship between stress, coping, and the combined influences of perceived stress and coping abilities on health and work performance.
